

Mahmud Hasan

AI Engineer

mah5472651@gmail.com · Barishal, Bangladesh · github.com/mah5472651 · linkedin.com/in/mahmudhasan-ai-engineer/

SUMMARY

AI engineer bridging advanced research and production-grade systems. COO of Craftly (frontier LLM productization) and Founder & CEO at Aeitron AI (multi-agent automation for high-ticket sectors). Focus: multi-agent orchestration, high-performance RAG, eval gates, cybersecurity LLM infrastructure.

EXPERIENCE

COO · AI Engineer · Craftly

Present · Bangladesh / Remote

- Serve as COO while shipping frontier LLM capability — aligning research, engineering, and product delivery.
- Own production path: evaluation, reliability, and promotion criteria from prototype to shippable systems.
- Lead cross-functional teams building competitive AI products from Bangladesh.

Founder & CEO · Aeitron AI

Present · Barishal, Bangladesh / Remote

- Founded Aeitron AI for multi-agent automation in high-ticket sectors including real estate.
- Specialize in multi-agent orchestration, memory architectures, and high-performance RAG pipelines.
- Own product vision and technical direction for automation operators can trust in production.

EDUCATION

Higher Secondary Certificate (HSC) · Science Group

Govt BM College · Expected Completion: 2028 · Expected GPA: 5.00 · Barishal, Bangladesh

Secondary School Certificate (SSC) · Science Group

Baghia Al-Amin Kamil Madrasah · Completed: 2026 · GPA: 5.00 · Barishal, Bangladesh

SELECTED PROJECTS

Aeitron — Scratch-Trained Cybersecurity & Agentic Coding LLM

From-scratch cybersecurity LLM: training control plane, defensive data mixing, FSDP/DeepSpeed, gated 1k!1M qualification.

Aeitron AI Finance Dashboard

Unified Agency OS for finance, invoicing, CRM, and team tools with an AI copilot for real estate lead analytics.

VectorForge — Hybrid RAG Retrieval

Hybrid BM25 + dense + RRF + re-rank under "d180ms p99 retrieval budget; Recall@k / nDCG / faithfulness tracked.

Agent Release Gates — Eval CI for Agents

Merge-blocking agent evals (~120 tasks), faithfulness/tool gates, 5% canary with automatic rollback.

SKILLS

AI Systems: Multi-agent orchestration, advanced memory, high-performance RAG, LLM productization, cybersecurity intelligence

ML & Deep Learning: PyTorch, Transformers, Fine-tuning / LoRA, NLP, Evaluation & evals, Prompt systems

LLM Stack: RAG pipelines, Agents & tools, Vector search, LangChain / LangGraph, vLLM / inference

Software: Python, TypeScript, FastAPI, PostgreSQL, Team leadership, Product & ops (COO/CEO)
